

QUIZZI

ABSTRACT

QUIZZI – A Learning Management System

The "Quizzi" project aims to address the time-consuming nature of the manual quiz system and the cumbersome process of checking answer sheets in the current system, so this application will work as an online aid to conduct the examination process in an effective manner and give a classroom environment with online quiz

EXISTING SYSTEM :- Manual tests conduction takes more time and teachers need to prepare beforehand and arrange the tests accordingly and can also use online quizzing facility this wastes examiners time and takes more manual effort in resulting .

PROPOSING SYSTEM : This “Quizzi” application offers Live quiz feature and gives a Virtual Classroom Environment for Teachers and Students and help the examiners to save their valuable time and important data by accurate Questioning and Resulting system .

SOFTWARE REQUIREMENTS: -

- Python (Version 3.11)
- Flask (Version 2.3.2) , jinja
- HTML5
- CSS3
- JavaScript (Version 11)
- Bootstrap(Version 5.3)
- SQLite3

HARDWARE REQUIREMENTS: - Any Operating System with a WEB BROWSER –

Minimum required RAM - 4GB

MODULES :

Teacher Module – 21001-CS-073 – **A Sai Prakash**

Student Module – 21001-CS-084 – **Mukassir Ahmed Farooqui**

Live Quiz and Quiz Management Module – 21001-CS- 103 – **Varshita S**

Questioning Pattern Module- 21001-CS-081 – **M Ashruth**

Grading module – 21001-CS-068 – **B Kavya**
